Bloomberg Industrial Metals Forecast Accuracy Ranking - Q2'2016
2016-07-06 15:38:56.557 GMT

By Wei Lu
(Bloomberg) -- Industrial metals forecasters are ranked based on margin of error for the individual category and 0-100 score for the overall category. The ranking is based on data from Bloomberg's commodity price forecasts function CPFC.
To qualify for each individual category, forecasts had to be submitted before 4/2016 but no older than 12/2015. To qualify for the overall category, forecasting firms had to be eligible in at least half of the categories.
The ranking below measured forecast accuracy for the quarter ended on June 30, 2016.
